## Rethinking Rehab:

### How Physiatrists Can Go Above and Beyond in a Post-Pandemic World

As the world emerges from the pandemic, physiatrists have a vital role in helping patients recover from the long-term effects of COVID-19. While the pandemic has been challenging for many healthcare professionals, it has also allowed us to rethink and improve how we provide care. In this event, we'll explore ways physiatrists can go above and beyond in the post-pandemic world.

Physiatry, also known as physical medicine and rehabilitation, is a medical specialty that focuses on helping patients recover from physical disabilities, injuries, and other conditions that affect their movement and function. Physiatrists work with patients of all ages and backgrounds to help them regain their independence and improve their quality of life.

One of the key ways physiatrists can help in the post-pandemic world is by providing rehabilitation services for patients who have recovered from COVID-19. Many patients with COVID-19 experience a range of symptoms, such as fatigue, shortness of breath, and weakness, that can persist for weeks or even months after their initial illness. Physiatrists can help these patients regain their strength and function through exercise, therapy, and other treatments.

Another area where physiatrists can make a difference is telemedicine. The pandemic has accelerated telemedicine adoption, allowing patients to receive care remotely. This has been especially important for patients with disabilities or other mobility limitations, who may have difficulty traveling to appointments. Physiatrists can use telemedicine to provide virtual consultations, monitor patients' progress, and remotely deliver therapy and other treatments.

In addition to these clinical services, physiatrists can shape healthcare policy and advocate for patients' rights. By working with policymakers and other stakeholders, physiatrists can help ensure that patients with disabilities receive the care and support they need to live full and independent lives. This includes advocating for better access to assistive technology, such as prosthetics and mobility aids, and pushing for more significant funding for research into physical disabilities and rehabilitation.

In conclusion, physiatrists have an essential role in the post-pandemic world. By providing rehabilitation services for COVID-19 patients, embracing telemedicine, and advocating for patients' rights, physiatrists can make a significant difference in the lives of their patients. As we continue to navigate the challenges of the pandemic, let's remember the vital role of physiatrists in helping us recover and move forward.

This event will run for 4 days with various aspects such as basic science, technology, and databases in the field of PMR. The theme will be presented as a Plenary Lecture, Symposium, and Workshop.

# WELCOME MESSAGE

Chairman PIT XXII PERDOSRI

PIT  
PERDOSRI XXII  
2023  
MALANG

Dear Colleagues,

We extend a warm and heartfelt invitation to you to join us at the 22nd Annual Scientific Meeting of the Indonesian Physical Medicine and Rehabilitation Association (PIT XXII PERDOSRI) in October 2023.

This gathering of distinguished professionals aims to enhance our understanding of the fundamental sciences and promote professionalism in our field. By focusing on patients' functional capacity and expanding our clinical knowledge, we can navigate the various phases of rehabilitation more effectively. The current theme of the congress, "Rising to the Challenge: Innovations and Strategies for Rehabilitation in a Post-Pandemic World," aligns with our commitment to staying resilient and adapting to the changing landscape of healthcare.

We highly anticipate your presence at this remarkable event, where you will have the opportunity to engage in enriching discussions, network with colleagues, and contribute to the advancement of physical medicine and rehabilitation. Your active participation is invaluable to the success of the meeting.

Please feel free to reach out to us if you have any queries or require further information. We sincerely appreciate your contributions and unwavering support towards our meeting, and we look forward to welcoming you to this distinguished gathering.

Best regards,

**Dr. Yose Waluyo, MD**

(Musculoskeletal Physiatrist Consultant)

# WELCOME MESSAGE

President of The Indonesian Association of Physical Medicine and Rehabilitation (PERDOSRI)

Assalamu'alaikum wr. wb.  
Dear respected colleagues,

We hope this message finds you in good health and spirits. We are immensely grateful to Allah SWT for granting us the precious opportunity to gather once again at The 22nd Annual Scientific Meeting of The Indonesian Association of Physical Medicine and Rehabilitation 2023.

With deep reverence and gratitude, we embark on this momentous occasion, recognizing the significance it holds in our professional journey. Together, we form a community dedicated to enhancing the lives of individuals through the principles of physical medicine and rehabilitation. As we embark on this remarkable endeavor, let us reflect upon the blessings bestowed upon us and the responsibility we bear.

This year's chosen theme, "Rising to the Challenge: Innovations and Strategies for Rehabilitation in a Post-Pandemic World," underscores our resilience and adaptability as professionals. Despite the unprecedented global challenges we face, we remain united in our commitment to exploring innovative approaches and formulating effective strategies that will shape the future of rehabilitation in a world recovering from the pandemic's impact.

It is with great pleasure and anticipation that, on behalf of PP PERDOSRI, we extend a warm and wholehearted welcome to each and every one of you. Your presence at this esteemed gathering serves as a testament to your dedication, expertise, and unwavering commitment to the field of physical medicine and rehabilitation. Together, let us seize this opportunity to engage in meaningful discussions, exchange invaluable insights, and forge collaborations that will contribute to the advancement of our profession.

Throughout our time together, we aspire not only to expand our knowledge but also to cultivate a spirit of camaraderie and unity. Let us create an environment that fosters the sharing of experiences, research findings, and clinical breakthroughs. Through our collective wisdom and shared passion, we can make a profound impact on the lives of our patients, empowering them to regain their functional abilities, independence, and overall quality of life.

In conclusion, we extend our heartfelt gratitude to all those who have contributed to the organization of this event. From the tireless efforts of the organizing committee members to the generosity of our sponsors and partners, we recognize and appreciate your unwavering commitment and invaluable support. Without your dedication, this scientific meeting would not have come to fruition.

May the grace of Allah SWT guide us as we gather to exchange knowledge, forge connections, and renew our commitment to the noble cause of physical medicine and rehabilitation. We pray that this meeting serves as a wellspring of inspiration and empowerment, propelling us towards excellence in our practice and bringing us closer to our shared vision of a healthier, more inclusive society.

Thank you, and may peace be upon you all.  
Wassalamu'alaikum wr. wb.

Best regards,

Rumaisah Hasan, MD  
(Neuromuscular Physiatrist Consultant)

# CALL FOR PAPER!

PIT  
PERDOSRI XXII  
2023  
MALANG

## ABSTRACT GUIDELINES

**ONLY electronically submitted abstracts will be considered. Formatting the text in accordance with the instructions below :**

1. The abstract must be submitted in electronic form as Microsoft Word, typed in single spacing, the font in 12 points of Times New Roman, justified at the left margin, do not indent, and do not leave blank lines between paragraphs.
2. Abstract title should appear in bold, do not indent. The title should be considered and indicate the abstract's content, preferably in a short sentence.
3. The author's name (s) is written down first, followed by the last name, and omit degrees. Underlining the name of the author presenting the paper. On a separate line, type the name of institutions and countries. Author and co-author details (occupation, department, institution/hospital) should be mentioned clearly.
4. The abstract text should include background and/ or objective, study design, material and methods, results, discussion, and conclusion.
5. Please keep to the limit of **abstract text to 250 words** and **the title to 15 words**, with no limitation on the author's name and affiliation.
6. Use italics only when appropriate (e.g., for names of genus and species). Simple tables and graphs may be included.
7. The deadline for the abstract will not be exceeded **25 August 2023**, through the date of submission via the website ([pit.perdosri.org](http://pit.perdosri.org))
8. The scientific committee will review the abstracts and confirm if your abstract is accepted. The organizing committee will send its confirmation letter for each accepted paper.
9. Presenting author must be registered for the main event. The abstract may be presented as an e-posters or oral presentation after the author pays a full registration fee.

## ABSTRACT GUIDELINES

### Structure of the Abstract:

#### A. Original Research / Systematic Review / Meta Analysis

In addition, the following structure of the abstract must be strictly adhered to be admitted for reviewing: to be admitted for reviewing:

- Introduction/Background
- Material and Methods
- Results
- Discussion
- Conclusion
- Keywords (Max 5 keywords in alphabetic sequence)
- Optional: References (max. 5)

Note:

- Introduction/Background: State the main question or objective of the study and the major hypothesis tested, if any.
- Material and Methods: Patients (or Participants): State selection procedures, entry criteria, and numbers of participants entering and finishing the study. Methods or Interventions (or Assessment of Risk Factors): Describe essential features of any Interventions, including their method and duration of administration. For observational studies, clearly outline the independent variables.
- Results: Report the main findings of the study.
- Discussion : Compare the result findings with the other research ever done and mention about the reason
- Conclusions: State only those conclusions of the study that are directly supported by data, along with their clinical application (avoiding overgeneralization) or whether additional study is required before the information should be used in usual clinical settings.

#### B. Clinical Case

Cases presented are case studies or case series reporting on an unusual syndrome or medical condition resulting rehabilitation problem, a new diagnostic method, or highlight of an important clinical complication of a common condition, or a new/special intervention in the area of physical medicine and rehabilitation.

Please submit your clinical case according to the abstract topic it is (most) related to and according to the following structure:

- Case Diagnosis
- Case Description
- Discussion
- Conclusions
